

# HD CEDAR FLY TRAP

**Hate Flies? Try one of our wooden solar fly traps!**

Handsome and effective. Skillfully crafted from decay resistant cedar for a long life.

**No Odors**

**No Watery Mess**

**No Poisons**

**Reusable**

**Captures and dehydrates thousands of flies. Safe around pets and kids!**

**For control of adult and migrating fly populations. Use Anywhere Effective Fly Control is Needed!**

**ENVIRONMENTALLY SAFE:**

No chemicals or pesticides, use safe natural baits to attract flies.

**A GREEN PRODUCT:**

Earth friendly . . . uses wood which is a renewable resource.

**REUSABLE:**

Reduces unnecessary landfill clutter and expenses associated with disposable traps, fly paper, and pesticide containers. With proper use, will last many years.

**EASY TO CLEAN:**

No disgusting liquid mess. Empty out dehydrated flies, and trap is ready to be used again.

**LITTLE OR NO SMELL:**

Flies are dehydrated eliminating the smelly mess associated with water filled traps.

**EFFECTIVE:**

Will catch thousands of flies.

Non-toxic bait & bait tray included. Ships complete and ready to use after mixing bait.  
Plexiglas top keeps the rain out of the bait tray below and makes for easy dumping of dead flies.

## Fly Trap Bait

Extremely effective and easy to use & formulated to attract flies using state of the art pheromone technology. Flies, driven by their compulsive need to reach the lure, are drawn into and captured by the trap.

**Attracts and Traps Flies, Indoors or Outdoors      Just Add Water**

**Environmentally Safer**

**Bait lasts for a month or more**

**Add water to freshen the bait in tray**

**No nasty smelling powders to mix and store.**

**Bait is non-toxic to kids, pets and livestock**

## Instructions

Locate the HD Cedar Fly Trap:

- Near the sources of flies (ie manure piles)
- Away from livestock that may tip it over out of curiosity or clumsiness
- In the sun so flies dehydrate

Empty contents of fly bait pack into bait bowl (provided) or any container that will fit under the HD Cedar Fly Trap. Add water to moisten. Keep bait moist for best results. Bait has been effective for up to 30 days when kept moist.

Empty trap when flies file up far enough to cover the entry hole at the top of the cone over the bait bowl or sooner if desired.
